GUIDELINES FOR REVIEW OF RESEARCH COUNCIL WORKING PAPERS

Note: As part of enhancing the research and development activities at TISS, faculty members are encouraged to submit research proposals to the Research Council. Through this method, the faculty at TISS gets an opportunity to undertake small and medium sized research projects which foster knowledge building and help in exploring new areas of research. The findings of these research projects are submitted to the Research Council in the form of Working Papers that are published in our Working Paper Series.

These Working Papers are around 30,000 words in length and can have diverse formats depending on the focus of the research project/seminar/workshop (ranging from analysis of data to documentation of pilot interventions) that they have emerged from.

You are requested to review the attached working paper in accordance with the following guidelines:

1) Contemporary Relevance

2) Contribution to Knowledge

3) Clarity and logic in analysis
4) Language

5) Originality

6) Appropriateness of References

7) Other Recommendations

OVERALL REFEREE REPORT

1. Please indicate ‘Yes’ for any one of the following:

(a) Recommended for publication with only language editing

(b) Recommended for publication if the suggestions indicated in the attached sheet are implemented

(c) Not recommended because of reasons given on the attached sheet

Date: ___________________________  Signature of the Referee
